### Document Body

Hi Carmen,

Thank you for the update. I'll give you a call on Monday regarding the grading plan drawings.

Regards,

**Linda Conlan, PG**

**Principal Geologist**

**AMEC Geomatrix, Inc.**

**Subject:** PCBs: Pechiney Site in Vernin, California - Status of USEPA Region 9 Review of Pechiney Related Documents

**Importance:** High

Hello Linda:

Please accept my apologies for not being able to provide you sooner with a status of our review of your response to some of the conditions in our July 2, 2010 conditional approval of the risk-based TSCA application for cleanup of PCBs at the Pechiney site in the City of Vernon, California. I had started the review of those documents and that review was interrupted by several unexpected high priority PCB work that had to be completed within certain tight deadlines. I have resumed the review of the documents that you submitted and anticipate completing the review and getting back to you with feedback on the same within the next two weeks. In the meantime, I noticed the grading plan that you submitted for the site is limited to a figure that has no accompanying explanatory text. If by now you have text explaining the grading plan figure, I would appreciate receiving that explanatory text and believe such text will help expedite our review.

I am working from an alternate location today April 22, 2011 and will be back in the office on April 25. Please call me next week if you have any questions concerning this message.

Thank you for your courtesies, and most of all for your patience which I truly appreciate.

Sincerely,

Carmen

Carmen D. Santos, PCB Coordinator  
RCRA Corrective Action Office  
Waste Management Division  
USEPA Region 9
